ISBN Lookup And ISBN Search For Multiple Books With ISBN (Latest)

This program has two different modes of operation: 1) ISBN Lookup: When using this mode, the program will automatically do a search in the online database for any of your selected ISBN numbers. If there is an exact match, then the program will display a message letting you know. If not, then the program will ask for the ISBN number (if available) and re-run the search. In order for the program to get the ISBN number, it will have to search for the ISBN on the internet for the information of the last page that was displayed. 2) ISBN Search: When using this mode, you have to enter all the ISBN numbers that you want the program to search for. The program will then create a comma separated list with all the ISBN numbers that the program looks up. The program will automatically run the search for each ISBN number in the list.
